Diversion Rate

With your help we are holding strong with our District-wide **2025** Diversion Rate Goal of **18%**!

The District's diversion rate is the percentage of residential municipal waste diverted from the landfill through reuse, reduction, recycling, and composting programs.

After our landfills meet capacity, trash will need to be transported out of the valley, increasing vehicles on the road, emissions and transportation costs. Diverting from the landfill supports the longevity of the landfills and reduces our carbon footprint. WFWRD offers multiple diversion opportunities including recycling, glass recycling, and subscription weekly curbside green waste collection.

Check our website and follow us on social media to find out how you can help divert waste from the landfill: www.wfwrdutah.gov.
